

**All you need to
know about our
Data Rooms**

 **Mvltipartner**[®]
Virtual Data Room

What are the advantages from using your data rooms?

The guarantee of having certified and secure sharing tools with vertical control over data and access, 24/7/365, even on mobile devices.

**What information
do you need
to send us an
economic proposal?**

**Our ALL-
INCLUSIVE
formula is
based only on
time and space,
everything else
is unlimited
(users, projects,
permissions,
etc.)**

**Do you need
computer skills to
work on a VDR?**

**No, we develop platforms
that are user-friendly,
intuitive and easy to use.**

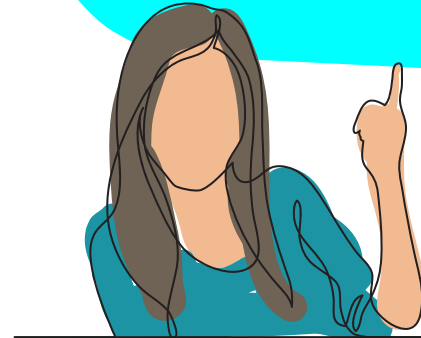

**Is it a tool only
used by large
companies? Is it
very expensive?**

**Absolutely not,
it is also widely
used by small
companies because
it is a modular and
versatile tool.**

**How quickly do you
open a platform?**

**With the FAST service,
as soon as we receive
your information we
release the data room
within minutes.**

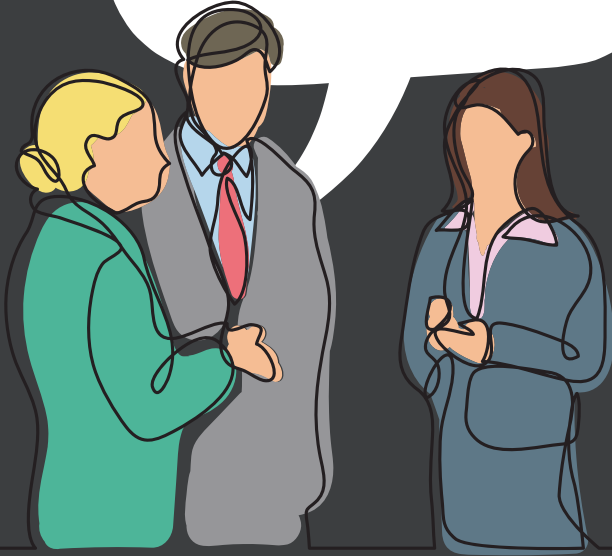

I am not familiar with the data room, is there any sort of training?

Of course! We offer a user-friendly platform, dedicated training sessions and video tutorials.

**Why use your VDR
instead of any
standard document
exchange system?**

**VDRs are designed
for business and
for managing
complex operations
and confidential
documents. Files
are end-to-end
encrypted, user
access is selective
and users are
unlimited.
We guarantee the
integrity of data
and its storage on
Italian territory.**

**Is user activity
in the data
room tracked?**

**Yes, it is
tracked since
the user's
first login and
monitored
through
advanced
certified
reports.**

Can we create selective user access on the documentation uploaded on the VDR?

Yes! You can decide who can see what on the various projects and revoke or change user permissions at any time.

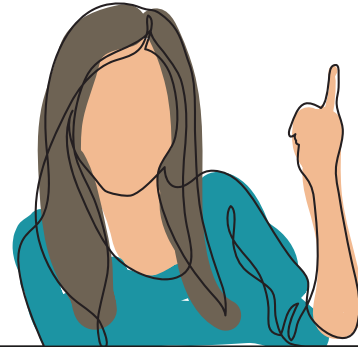

**How many users can
access
simultaneously?**

**Potentially
an unlimited
number of users**

**How many
users can we
register?**

**There are no limits,
you can register as
many users as you
wish and assign
customized roles to
each one.**

**What is a
dynamic
watermark?**

**It is a digital protection
applied to files with
information on the
session and the user
who is viewing and/or
downloading the file.**

Can I choose the graphics I want?

Clients can count on our web and graphics team for customizing and implementing the layout they prefer.

Being a tailor-made service it is probably very expensive...

Absolutely not! The cost depends only on space and time. The more you use, the less you pay.

What kind of assistance do you provide?

Double multilingual assistance: Client Support dedicated to our Clients and Helpdesk for VDR users.

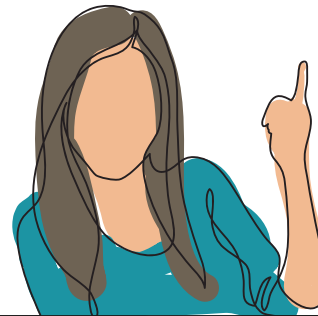

Is there a reporting system with Virtual Data Room activity reports?

Yes! You can set parameters to generate real-time reports and get a 360° view of what is happening in the data room.

**Is the assistance
you provide
multilingual?**

**Yes, we manage your
requests in English, Italian,
Spanish and French through
an advanced ticketing
system.**

**Where are your
data centres
located?**

**They are located on Italian
territory, certified and
connected by private double
geostatic fibre, accessible only
to Multipartner's data.**

What formats can we upload on the platform?

There are no restrictions, you can upload any format and also decide to exclude specific formats from being uploaded to the platform.

Is it possible to automatically notify users when new files are uploaded?

Yes, and obviously only users who have viewing permissions on those files will receive the notification.

We would like only certain files to be downloadable, is that possible?

Yes, we have a double authorisation level on both files and users. To make the file downloadable both permissions must be activated.

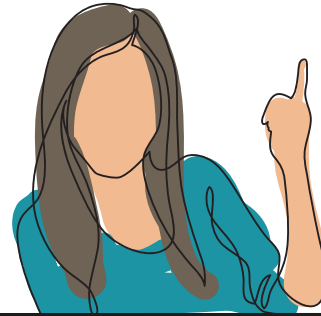

**How do you
upload files?**

**It is very easy, just
drag & drop them from
your computer into the
document section of the
VDR. In the same way you
can upload entire tree
view structures.**

I travel a lot, can I access the data room through my mobile devices?

Of course! With our App you can access the VDR whenever you want, from wherever you want. You can also access the files offline.

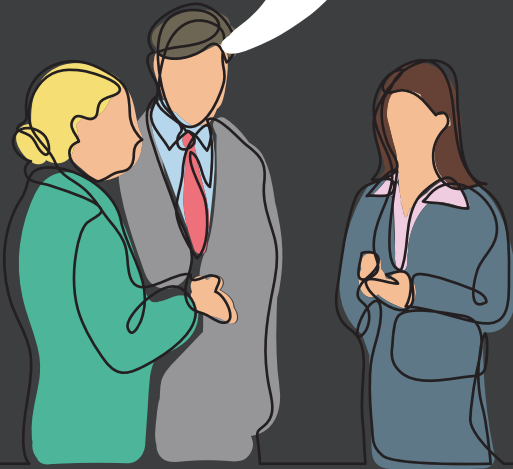

**Is it possible to
bulk download the
documentation?**

**Yes, and you can also
decide which users
may or may not be
able to download it.**

Is it possible to download the documentation index from the VDR?

Yes, and it is very easy: just click on the icon and download an updated index that only includes the files that you have access to.

When the data room is closed, what happens to our data?

We provide an encrypted link of the VDR that can be downloaded and that ensures data integrity, and permanently delete the data within the contractual terms.

Is there a Q&A section on files and folders?

Yes, and it can be configured with specific roles for the selective management of questions/answers.

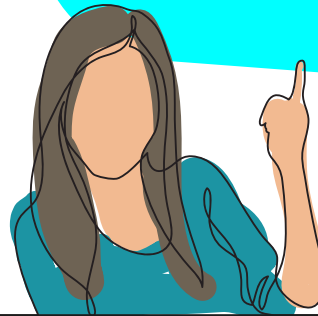

Do you have a file search function?

Yes, we have an advanced full-text search system (also on scanned documents). You can find files through various search filters: date, extension, file status, file/folder name, file text and notes.

My R&D department is working on a patent that requires maximum confidentiality and collaboration with foreign colleagues. Would your data room be helpful?

Yes, our collaborative and highly secure workspace data room would be the ideal platform that meets both of these needs.

We need to digitise many confidential documents and organise them in such a way that they are easy to find...

...while maintaining high levels of protection on files.

The VDR is a secure environment for organising, classifying and indexing documentation by folders and categories. Files are easily found with the advanced search.

We often organize Due Diligence on behalf of our clients.

We would like to be sure to recommend a safe and flexible tool.

Our VDR supports and speeds up DD of all kinds and can be configured ad hoc. Automatic indexing, alerts on uploaded documents, Q&A, granular user access, dedicated reports and user activity tracking are just some of the functions that can be activated.
